

Every child has a strong sense of

每个小孩都有强烈的

curiosity!!!

好奇心!!!

When children are curious about the surrounding, that is the best time for them to learn. The objective of "Discovering Science" is to cultivate children's curiosity and enthusiasm for learning through the hands-on experiments, besides developing their skills on questioning, analyzing and problems solving and hence leading the child to become a talented person who is not only knowledgeable but with pioneering spirit.

当孩子对周围事物充满好奇时，就是学习的最佳时刻。“Discovering Science”课程的目标就是培养孩子的好奇心与求知欲，通过自己动手做实验，在实践中培养自己发现问题，分析问题和解决问题的能力，使孩子成为一个知识广博及具有开拓精神的人才。

蒙台梭利名言  
 Maria Montessori Quotation

“ I hear I forget      “我听过 我会忘记  
 I see I remember    我看过 我会记得  
 I do I understand ” 我做过 我就理解了”

Discovering Science Curriculum Programme

Hands-on Experiment 动手做实验

Parent-Child Interaction Activity 亲子互动

Experiment Materials 实验教材

All Started From Here 从这里开始

QUESTION??? 发问???  
 DISCUSS... 讨论...  
 DISCOVER!!! 发现!!!

“Great minds question things; Great minds discuss things; Great minds discover things”  
 “丰富的思维懂得发问问题;丰富的思维懂得讨论事情;丰富的思维懂得发现事物”
