Computer Music Programme
for Early Childhood

Miditots Curriculum

The concepts and skills that are covered in each weekly lesson-plan are provided in the Teachers' Teaching Resource and teachers are trained to modify lessons based on the needs of the children in their classes.

The programme is so unique that children will learn to play the keyboard and other pitched instruments to the accompaniment of specially composed and arranged music pieces.

The curriculum will include:

All forms of musical expression (Vocal, Instrumental & movement) formulated with progressive group music-making activities that are fun and stimulating.
