

Perceiving and learning by 'doing'

'Hand' is not just a limb to manipulate things but it is the source of wisdom. It is necessary for children to use their hands to manipulate objects in order to understand things. Therefore, in the learning process, if children are exposed to visual, tactile and kinaesthetic and other experiences which involve many senses, good learning results can be achieved.

Through "Multi Sensory Programme", children not only obtain life skills and knowledge, but their abilities in different aspects will be strengthened too. They will also experience a sense of success. Repeated experience of perceiving and learning by 'doing' enables children to use their brain actively and take bold attempt in activities, and thus becoming confident and capable of solving problems.

在“做”中感知、在“做”中学习

'手'不仅是让我们操控事物的肢体，也是智慧的来源。运用手来操作物体以达到对事物的认识是幼儿学习的必要途径。因此，在学习的过程中，如果给予幼儿视觉、触觉和动觉等多方面的体验，让幼儿的多种感官都参与其中，就能达到很好的学习效果。

"Multi Sensory Programme"不仅使幼儿在学习的过程中获得了生活技能与知识，而且他们各方面的能力也被加强。此外，幼儿也能从中体验成就感。多次在“做”中感知、在“做”中学习的经验可让幼儿在活动中大胆尝试、积极动脑，进而成为有自信、有创造力和又有能力解决问题的孩子。

'Multi Sensory Programme' helps you to nurture a healthy, happy, confident and yet creative child with ability to solve problems.

'Multi Sensory Programme' 协助您培养健康快乐，有自信，有创造力又有能力解决问题的孩子。

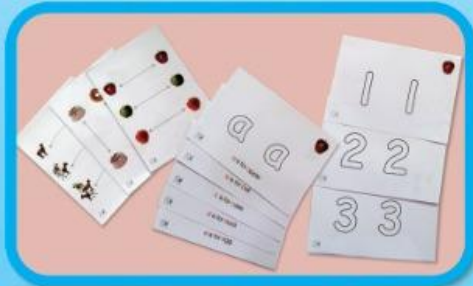

Our Teaching Materials 我们的教材

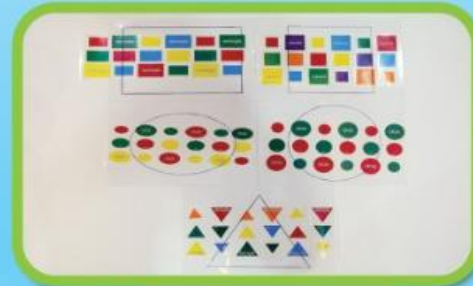

Tactile alphabets and number cards set
触觉字母和数字卡组合

Alphabets reinforcement and skills development kit
字母强化及技能开展教材

Alphabets and numbers worksheet
(using different fun methods to trace)
字母和数字作业单(使用各种不同与有趣的方式来描绘)

Cognitive learning materials 认知学习教材
